Profile

Computer Science graduate specializing in Data Science with experience in Agentic AI, multi-agent systems, and Retrieval-Augmented Generation (RAG) applications. Skilled in Python, LangGraph, LangChain, Azure AI Search, Azure AI Foundry, and cloud-based AI solution development. Proficient in LLM orchestration, workflow automation, cloud-native application development, and secure Azure deployments. Strong foundation in Machine Learning, Deep Learning, and Generative AI. AWS Certified AI Practitioner.

Work Experience

Systems Engineer Trainee — Tata Consultancy Services (TCS) Apr 2025 – Present

BFSI UK-1

- Developed a multi-agent AI assistant using LangGraph, LangChain, and Azure AI Foundry to help sales teams analyze client DevOps challenges and recommend relevant GitLab solutions.
- Built a multimodal RAG system using Azure AI Search, integrating GitLab documentation, internal PowerPoint presentations, and scraped knowledge sources.
- Implemented hybrid retrieval, reranking, and web search integration to improve response accuracy and knowledge coverage.
- Designed ingestion and indexing pipelines using Azure Blob Storage and Azure Cosmos DB for knowledge management and conversational memory.
- Reduced response latency through parallel execution of retrieval, web search, and agent workflows.
- Implemented PII masking and deployed the solution within a secure Azure VNet using private endpoints.

Nationwide Building Society

- Collaborated on developing an Agentic AI solution integrated with ServiceNow to automate incident analysis, solution identification, and knowledge retrieval using RAG on Azure.
- Built workflows to assist technical teams in faster ticket resolution by leveraging enterprise knowledge sources and AI-driven recommendations.

Tata Steel UK Ltd

- Monitored cloud security alerts and vulnerabilities using Google Cloud Security Command Center (SCC) during enterprise cloud migration initiatives.
- Performed alert triage, created ServiceNow incidents for high-severity findings, and coordinated with engineering teams to support incident response and vulnerability remediation.

Skills

Programming:	Python, SQL
AI / LLM Frameworks:	LangGraph, LangChain, Azure AI Foundry
Machine Learning:	TensorFlow-Keras, Scikit-learn
Backend:	FastAPI, Streamlit
Cloud:	Azure, Azure AI Search, Azure Cosmos DB, Azure Blob Storage, Docker, GitLab
Data:	Pandas, NumPy, MySQL, Vector Databases

Education

BTech (CSE - Data Science), Haldia Institute of Technology
CGPA: 8.46

2020 – 2024

Senior Secondary (XII), Rajkamal Saraswati Vidya Mandir
Percentage: 84%

2017 – 2019

Secondary School (X), Guru Gobind Singh Public School
CGPA: 10.0

2016 – 2017
